INTRODUCTION

STATISTICS PRESENTED IN THIS PUBLICATION

This publication presents a range of social and housing statistics produced from the 2001 Census of Population and Housing for suburbs in the Perth metropolitan area and the City of Mandurah, and for postal areas in Western Australia (WA) as a whole. Together with population counts, it includes tables of selected Census data which describe the characteristics of people living in each area and their housing arrangements.

Refer to the Glossary for a more detailed description of the geographic areas.

POPULATION MEASURES

The data presented in this publication relates to where people were enumerated on Census Night ('place of enumeration' counts). Census counts of people based on where they usually live ('usual residence' counts) are also available, but have not been provided in this publication.

Census counts should not be confused with the Australian Bureau of Statistics (ABS) official population estimate, the Estimated Resident Population (ERP). Estimated Resident Population is used to determine electoral boundaries and informs the distribution of government funds to state and local governments. ERP is the definitive population estimate. It is derived from Census usual residence counts and includes a number of adjustments, for example, Australians temporarily overseas.

One of the important features of the Census is that it describes the characteristics of Australia's population and housing for small geographic areas and small population groups. While not available in this publication, data at the smallest geographic level, the Collection District (CD), are available in a range of census products. For more information on these products, please refer to Appendix 2 — Census Products and Services. Concepts and definitions used in this publication are explained in the Glossary and more detailed information is available in the *2001 Census Dictionary* (cat. no. 2901.0). The Explanatory Notes in this publication provide a discussion of the scope and coverage of the Census, the different measures of population, and the limitations of Census data.

This publication is one of a series which provides data at different levels of geographic aggregation. Similar publications are available at the Statistical Local Area (SLA) level for each state and territory, and for the whole of Australia. See Appendix 2 — Census Products and Services for more information.

SUMMARY OF FINDINGS

SUBURBS OVERVIEW

This publication contains data referring to defined suburbs in the Perth metropolitan area and the City of Mandurah. In the section that follows, 'Perth/Mandurah region' is the term used to describe the sum of all the defined suburbs.

POPULATION

In the 2001 Census of Population and Housing, the Perth/Mandurah region had a population of 1,353,558 persons.

Suburb populations varied widely from more than 22,000 to less than 50 persons. The suburbs with the largest populations were Thornlie (22,689 persons), Dianella (20,226), Armadale (20,101), Ballajura (19,784) and Morley (18,573).

SEX

There were slightly more females than males counted in the Perth/Mandurah region, which comprised 691,163 (51.1%) females compared with 662,395 (48.9%) males. At the suburb level, there were some significant differences in the proportions of females to males.

The suburbs with the highest proportion of females were Peppermint Grove (58.6%), Menora (56.3%), Cullacabardee (55.8%), Bentley (55.4%), Joondanna (55.1%) and Brentwood (55.0%).

Males were a majority in the suburbs of Naval Base (73.3%), Casuarina (73.0%), Perth (58.6%) and East Perth (58.5%).

AGE

The median age of people enumerated in the Perth/Mandurah region was 35 years and 11.5% of the population was aged 65 years and over.

Suburbs with the highest median ages were East Rockingham (60 years), Madeley (49), Dudley Park (48), Carmel (47) and Mandurah (47). East Rockingham also had the largest proportion (37.6%) of its population aged 65 years and over. Other suburbs with a large proportion of the population aged 65 years and over were Menora (32.7%), Mandurah (29.1%), Dudley Park (28.1%) and Shoalwater (26.6%). These suburbs had a relatively high proportion of their population in caravan parks, non-private dwellings and/or self-care accommodation for the aged.

Cullacabardee had the lowest median age (19 years) and the second lowest proportion of persons aged 65 years and over (1.1%). The low median ages were primarily located in the newer suburbs, for example Tapping; or where there were residential colleges attached to tertiary or other educational institutions, for example Murdoch and Crawley. Other suburbs with a low proportion of persons aged 65 years and over were Tapping (1.8%), Leda (2.0%), Naval Base (2.2%) and Jane Brook (2.2%).

ABORIGINAL AND TORRES STRAIT ISLANDER STATUS

In the Perth/Mandurah region, 1.5% of the population reported being of Aboriginal or Torres Strait Islander origin. The suburbs with the largest Indigenous populations were Armadale (789 Indigenous persons), Girrawheen (598), Gosnells (566), Balga (421) and Maddington (340).

LANGUAGE OTHER THAN ENGLISH	<p>In the Perth/Mandurah region, 13.3% of the population spoke a language other than English at home. The suburbs with the highest proportions were Mirrabooka (42.1%), Stirling (40.6%), Karawara (40.0%), Murdoch (37.0%) and Herdsman (35.9%).</p>
TENURE TYPE	<p>There were 564,105 dwellings counted in the Perth/Mandurah region; 92% were occupied private dwellings, 7.9% were unoccupied private dwellings and 0.1% were non-private dwellings. Of the occupied private dwellings, 35.9% were reported as being fully owned, 33.9% as being purchased and 23.9% as being rented.</p> <p>There were 33 suburbs (11.4%) in the Perth/Mandurah region where the proportion of full home ownership was 50% or more. The suburbs with the highest level of full home ownership were East Rockingham (75.8%), Dalkeith (64.6%), Madeley (62.9%), City Beach (62.1%) and Winthrop (61.8%). In 55 suburbs, the proportion of full home ownership was 25% or less. The suburbs with the lowest level of full home ownership were Banksia Grove (8.5%), Northbridge (8.8%), Herdsman (9.8%) and Tapping (9.9%).</p> <p>The suburbs which had the highest proportions of dwellings being purchased were Tapping (82.7%), Jane Brook (75.7%), Atwell (73.5%), Carramar (69.5%) and Banksia Grove (67.7%).</p> <p>The suburbs which reported having the highest proportion of dwellings being rented included Herdsman (67.9%), Crawley (60.2%), Malaga (60.0%) and West Perth (58.3%).</p>
INCOME	<p>The median weekly personal income for the Perth/Mandurah region was \$376, and the median weekly household income was \$794.</p> <p>The suburbs with the highest median weekly personal incomes were Tapping (\$588), Cottesloe (\$585), City Beach (\$575), Dalkeith (\$574) and Peppermint Grove (\$562). The lowest weekly median personal incomes were found in the suburbs of Malaga (\$126), Cullacabardee (\$150), Karawara (\$203), East Rockingham (\$231) and Coodanup (\$233).</p> <p>The suburbs with the highest median weekly household incomes were Dalkeith (\$1,683), Peppermint Grove (\$1,582), City Beach (\$1,577), Iluka (\$1,361) and Belhus (\$1,350). The lowest median weekly household incomes were found in the suburbs of Cullacabardee (\$342), East Rockingham (\$367), Herdsman (\$396), Bentley (\$399) and Mandurah (\$401).</p>
HOUSING LOAN REPAYMENTS	<p>The median monthly housing loan repayment for the Perth/Mandurah region was \$855.</p> <p>There were 103 suburbs (35.6%) with median monthly housing loan repayments of \$1,000 or more, two suburbs (Dalkeith and Peppermint Grove) had median monthly housing loan repayments of \$2,000 or more. Other suburbs with the high median monthly housing loan repayments were City Beach (\$1,723), Cottesloe (\$1,692) and Crawley (\$1,651).</p>

HOUSING LOAN
REPAYMENTS *continued*

The suburbs with the lowest median monthly housing repayments were Herdsman (\$450), Medina (\$470), Koongamia (\$510), Calista (\$548) and East Rockingham (\$550).

RENT PAYMENTS

In the Perth/Mandurah region the median weekly rent payment was \$142.

Dalkeith, City Beach and Iluka, were amongst the suburbs which had the highest median housing loan repayments, also had some of the highest median weekly rent payments (\$344, \$317 and \$278 respectively). Other suburbs with high median weekly rent payments were Winthrop (\$263), Peppermint Grove (\$247) and Cottesloe (\$245).

Suburbs with the lowest rent payments were Cullacabardee (\$62), Koongamia (\$80), Bentley (\$91), Willagee (\$91) and Koondoola (\$92).

(a) Postal Areas are ranked from greatest (1) to least (305).

(b) Medians of '\$2,000 or more' for loan repayments are all shown as '\$2,000' in this table.

EXPLANATORY NOTES

SCOPE AND COVERAGE

1 The 2001 Census of Population and Housing was held on 7 August 2001. Australia's first national Census was held in 1911 and since 1961 a Census has been taken every five years, a frequency which is specified in the *Census and Statistics Act 1905*. The objective of the Census is to count the number of people in Australia on Census Night, identifying their key characteristics and those of the dwellings in which they live.

2 The Census aims to count every person who spent Census Night in Australia. This includes Australian residents in Antarctica and people in the territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External Territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only people in Australia on Census Night who are excluded from the Census are foreign diplomats and their families.

3 The Census includes people on vessels in or between Australian ports, on board long distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on Census Night are counted while people leaving an Australian port for an overseas destination before midnight on Census Night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than one year, only basic demographic data are available. The Census includes homeless people and people camping out.

4 All occupied dwellings are counted in the Census with the exception of diplomatic dwellings. Unoccupied private dwellings are also counted with the exception of unoccupied dwellings in caravan parks, marinas and manufactured home estates, and units in accommodation for the retired or aged (self-care). Unoccupied residences of owners, managers or caretakers of such establishments are counted.

5 Details about the 2001 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *2001 Census of Population and Housing: Nature and Content* (cat. no. 2008.0).

ABS POPULATION ESTIMATES

6 All counts in this publication are on a 'Place of enumeration' basis. 'Place of enumeration' means where the person was counted on Census Night. The Census can provide person counts based on 'Place of usual residence' for Collection Districts (CDs) and aggregations of CDs.

7 The Estimated Resident Population (ERP) is the official ABS estimate of the Australian population. The ERP is based on results of the Census of Population and Housing. It is compiled as at 30 June of each Census year and updated quarterly between Censuses. The intercensal estimates of the resident population are revised following the next Census.

8 For Census years, the ERP is derived from Census usual residence counts, by making the following three important adjustments:

- An adjustment for Census net underenumeration (or undercount). The level of underenumeration is derived from the Post Enumeration Survey which is conducted soon after the Census, and from estimates based on demographic analysis;
- The inclusion of an estimated number of Australian residents who are temporarily overseas on Census Night and are therefore not covered by the Australian Census. The number of such people is estimated from statistics on overseas arrivals and departures; and
- The third adjustment occurs because the Census does not fall on 30 June. For example, the 2001 Census was held on 7 August. Back dating of population estimates from 7 August to 30 June is accomplished using data from birth and death registrations, overseas arrivals and departures, and estimates of interstate migration, for the period 1 July to 7 August.

9 For the years between Censuses, the ERP is calculated using different methods for various geographic levels. For further information on the calculation of ERP, see *Demographic Estimates and Projections: Concepts, Sources, and Methods* (cat. no. 3228.0).

10 ABS population estimates are published in *Australian Demographic Statistics* (cat. no. 3101.0), produced quarterly, and in *Population by Age and Sex, Australian States and Territories* (cat. no. 3201.0) produced annually. ERPs for SLAs are published in *Regional Population Growth, Australia and New Zealand* (cat. no. 3218.0).

11 The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration) of the resident population of Australia, States and Territories. These projections are published every two years in *Population Projections, Australia* (cat. no. 3222.0)

DATA LIMITATIONS

12 Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:

- *Partial non-response* — In some cases where an answer is not provided to a question an answer is imputed (often from other information on the form). In other cases a 'Not stated' code is allocated;
- *Processing error* — While such errors can occur in any processing system, quality management is used continuously to improve the quality of processed data, and to identify and correct data of unacceptable quality;
- *Random adjustment* — Table cells containing small values are randomly adjusted or suppressed to avoid releasing information about particular individuals, families, or households. The effects of these adjustments are statistically insignificant;

DATA LIMITATIONS *continued*

- *Respondent error* — Because processing procedures cannot detect or repair all errors made by people in completing the forms, some remain in final data; and
- *Undercount* — Although the Census aims to count each person, there are some people who are missed and others who are counted more than once. The data in this publication are not adjusted for the net undercount.

13 Further information on data quality is provided progressively in *Census Update and in 2001 Census Papers*.

QUALITY OF INDIGENOUS STATISTICS

14 For further information on the quality of Indigenous statistics, see *Population Distribution, Aboriginal and Torres Strait Islander Australians* (cat. no. 4705.0). This publication presents counts for Aboriginal and Torres Strait Islander Australians from the 2001 Census for Indigenous geographic areas, accompanied by information on data quality to help interpret the data. Estimates of the Indigenous population, based on the 2001 Census, are also included. For comprehensive information on the quality of Indigenous Census data, see *Population Issues, Aboriginal and Torres Strait Islander Australians* (cat. no. 4708.0)

OVERSEAS VISITORS

15 Overseas visitors are defined differently for the 2001 Census. For the 1996 Census overseas visitors were defined as any person who stated they would be in Australia for less than 6 months. For the 2001 Census they are defined as any person who stated they would be in Australia for less than 12 months. Data for overseas visitors are restricted to age, sex and marital status.

CALCULATION OF MEDIANS

16 A median is a measure of central tendency. It is a mid value which divides a population distribution into two, with half the observations falling below it and half above it. Unlike averages (means) medians are not usually skewed by extreme observations.

17 There are a number of issues to be aware of:

- The categories 'Not stated' and 'Not applicable' are not included in the calculation of medians
- The category 'Overseas visitor', is only included in the calculation of the median when data for overseas visitors is collected for the variable (see paragraph 15). For example, 'Median age' in table 1 of this publication includes overseas visitors whereas 'Median weekly individual income' in the same table does not
- If a median falls into a category that has a text only label, then a value of 0 is used for that category. For this publication this is only relevant to the calculation of median personal income, as the income classification includes categories 'Nil income' and 'Negative income'

CALCULATION OF MEDIANS

continued

- When calculating a median on a classification containing ranges, the median may fall into a range which is open-ended. In this case, the median would be set to the number in the label. For example, in the calculation of median weekly individual income, if the median was to fall in the last range \$1,500 or more, then \$1,500 would be allocated as the median
- 'Median monthly housing loan repayment' and 'Median weekly rent' are based on ranged variables due to difficulties associated with the large number of small cells when using individual dollar values to perform these calculations.

ABBREVIATIONS AND SYMBOLS

ABS	Australian Bureau of Statistics
ASGC	Australian Standard Geographical Classification

APPENDIX 2

CENSUS PRODUCTS AND SERVICES

2001 PRODUCTS AND SERVICES

A wide range of products and services are available from the 2001 Census of Population and Housing. Brief descriptions of these are included below. For more detailed information on the 2001 Census range of products and services, please refer to the 2001 *Directory of Census Statistics* (cat. no. 2910.0).

Census products fall into two broad types: reference products and data products. Most of the reference products from the 2001 Census are available free of charge from the ABS web site.

CENSUS REFERENCE PRODUCTS

2001 Census Dictionary

The *2001 Census Dictionary* (cat. no. 2901.0) is a comprehensive reference guide to the 2001 Census of Population and Housing. The Dictionary includes a complete listing of 2001 Census classifications. It describes new topics introduced for 2001 and highlights classification changes that have occurred since the 1996 Census. The Dictionary also explains the concepts relevant to Census collection, processing and output of data.

How Australia Takes a Census

How Australia Takes a Census (cat. no. 2903.0) provides information about the history of the Census, the planning process and the way in which the Census is conducted.

Geographic Classifications and Codes

Statistical Geography: Volume 1 — Australian Standard Geographical Classification (ASGC) 2001 Census Edition (cat. no. 1216.0) provides information about the names and codes of the standard geographic areas used in the 2001 Census. *Statistical Geography: Volume 2 — Census Geographic Areas Australia, 2001 Census Edition* (cat. no. 2905.0) and *Statistical Geography: Volume 3 — Australian Standard Geographical Classification (ASGC) Urban Centres/Localities: 2001 Census Edition* (cat. no. 2909.0) provide information on additional geographic areas.

2001 Census Statistical Local Area Maps

These reference maps show the Statistical Local Areas (SLAs) from the 2001 Census. Each map shows the boundary of an SLA and the Collection District boundaries contained within.

Digital Boundaries

Census boundaries are made available electronically as Digital Boundaries. They include all of the *Australian Standard Geographical Classification* (ASGC), Urban Centres and Localities, and Census-specific areas.

Nature and Content

Details about the 2001 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *2001 Census of Population and Housing: Nature and Content* (cat. no. 2008.0).

CENSUS DATA PRODUCTS

Census Snapshots	<p>Census Snapshots are a new product designed to provide a summary overview for selected geographic areas and are available from the ABS web site, free of charge. Census Snapshots contain subsets of Community Profile data, including person counts, age and birthplace, presented in a narrative form for easy access by a wide audience. A 1901 Census Snapshot for Australia is also available to celebrate the Centenary of Federation.</p>
Estimated Resident Population	<p>The Estimated Resident Population (ERP) is the official ABS population estimate. It is based on Census usual residence counts, and is updated quarterly using births, deaths and migration data.</p> <p>Two publications containing ERP data, based on 2001 Census figures are:</p> <ul style="list-style-type: none">■ <i>Australian Demographic Statistics — 2001 Census Edition</i> cat. no. 3101.0■ <i>Regional Population Growth, Australia — 2001 Census Edition</i> cat. no. 3218.0.
Selected Characteristics	<p>The Census of Population and Housing suite of publications contains data and commentary on various person and dwelling characteristics from the 2001 Census at selected geographic levels. There are three series of publications in the suite with the following sub-titles:</p> <ul style="list-style-type: none">■ <i>Selected Social and Housing Characteristics, Australia 2001</i> cat. no. 2015.0■ <i>Selected Social and Housing Characteristics for Statistical Local Areas 2001</i> cat. nos 2015.1–8■ <i>Selected Characteristics for Urban Centres and Localities, Australia 2001</i> cat. no. 2016.0■ <i>Selected Characteristics for Urban Centres and Localities 2001</i> cat. nos 2016.1–7■ <i>Selected Education and Labour Force Characteristics, Australia 2001</i> cat. no. 2017.0■ <i>Selected Education and Labour Force Characteristics for Statistical Local Areas 2001</i> cat. nos 2017.1–8.
Community Profile Series	<p>The Community Profile Series provides detailed and comprehensive Census characteristics of people, families and dwellings for small areas. This series is available for all standard Census geographic areas, and is available in hardcopy and electronic formats.</p> <p>The series comprises six Community Profiles:</p> <ul style="list-style-type: none">■ <i>Basic Community Profile</i> (cat. no. 2001.0) contains 33 tables of detailed data covering dwelling, household and family topics. This profile is available for all standard Census geographic areas, Commonwealth and State Electoral Divisions, Postal Areas, and Suburbs, for the states/territories and Australia.

- Community Profile Series
continued
- *Indigenous Profile* (cat. no. 2002.0) contains 29 tables of key Census characteristics for Aboriginal and Torres Strait Islander people, for all ASGC areas from Statistical Local Area (SLA) level to whole of Australia, as well as Indigenous Areas and Aboriginal and Torres Strait Islander Commission (ATSIC) regions.
 - *Time Series Community Profile* (cat. no. 2003.0) contains 22 tables comparing data from the 1991, 1996 and 2001 Censuses where the classifications are comparable. Data is presented on 2001 geographic boundaries.
 - *Usual Residents Profile* (cat. no. 2004.0) contains 28 tables of data for persons usually resident in the selected area. This is the only community profile based on place of usual residence.
 - *Expanded Community Profile* (cat. no. 2005.0) contains 49 tables available for SLAs and larger areas, comprising more detailed versions of some of the Basic Community Profile tables, plus additional tables.
 - *Working Population Profile* (cat. no. 2006.0) contains 19 tables of labour force and related data on the characteristics of employed people.

Classification Counts *Classification Counts* (cat. nos 2022.0–8) provide frequency counts for 2001 Census variables in complete classificatory detail, for every state/territory and capital city statistical division, cross-classified by sex where applicable.

CLIB2001 CLIB2001 is an electronic product provided free of charge to public libraries through the ABS Library Extension Program. The product contains a large volume of tabulated data and software that allows access, display and printing of the data. For 2001 this product will be available as both a CD-ROM and (limited access) Internet-based product. CLIB2001 comprises the complete 2001 Census Community Profile Series and Classification Counts.

CDATA 2001 CDATA 2001 is a CD-ROM product which contains a large volume of tabulated Census data, digital boundaries and base map data, with software to produce tables, maps and graphs of the data. The product is available at the Australia and state/territory levels.

There are two CDATA 2001 products available, offering different levels of functionality:

- CDATA 2001 — Full Geographic Information System (GIS): This version is aimed at the expert GIS user who requires detailed spatial data analysis using Structured Query Language, geocoding and importation of 'client own' data.
- CDATA 2001 — Quickbuild: This version has been designed for GIS users with more basic spatial analysis requirements. It allows users to produce data reports, graphs and/or maps. The product is aimed at inexperienced or intermediate GIS users. CDATA 2001 — Quickbuild users will also have the option to upgrade to CDATA 2001 — Full GIS if so desired.

Social Atlas Series	The <i>Social Atlas</i> (cat. nos 2030.0–8) publications feature colour maps of the key social, demographic and economic characteristics of each capital city. These will be released from November 2002.
Australia in Profile — A Regional Analysis	<i>Australia in Profile — A Regional Analysis</i> (cat. no. 2032.0) provides commentary and data on a number of key social indicators from the 2001 Census, with the focus on regional distributions and comparisons.
CONSULTANCY SERVICES	<p>The following Census specific services are available:</p> <ul style="list-style-type: none"> ■ <i>Customised Profiles Service</i> provides community profile data tailored to your needs on a variety of media ■ <i>Customised Table Service</i> provides detailed cross-classified tables tailored to your needs on a variety of media ■ <i>Customised Geographic Data Reports Service</i> provides tabular geographic data which relate specifically to the Census Geographic Areas and their characteristics (e.g. area) ■ <i>Customised Mapping Service</i> provides both Customised Thematic Maps and Customised Reference Maps on request.

GLOSSARY

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the *2001 Census Dictionary* (cat. no. 2901.0).

Dwelling A dwelling is a structure which is intended to have people live in it, and which is habitable on Census Night. Some examples of dwellings are houses, motels, flats, caravans, prisons, tents, humpies and houseboats.

There are private and non-private dwellings:

- A private dwelling is normally a house, flat, part of a house, or even a room; but can also be a house attached to, or rooms above, shops or offices; an occupied caravan or unit in a caravan park or craft in a marina; occupied dwelling in a Manufactured Home Estate; occupied self-care unit in Accommodation for the Retired or Aged; a houseboat; or tent if it is standing on its own block of land. An occupied caravan situated on a residential allotment is also classed as a private dwelling. Private dwellings can be either occupied or unoccupied.
- Non-private dwellings are those dwellings not included above, which provide a communal or transitory type of accommodation. They are classified according to their function. These dwellings include hotels, motels, guest houses, prisons, religious and charitable institutions, defence establishments, hospitals and other communal dwellings. Only occupied non-private dwellings are included in the Census.

Family A family is defined by the ABS as two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household. The basis of a family is formed by identifying either a couple, parent-child or other blood relationship. Information on persons temporarily absent on Census Night is considered in family coding.

Geographic areas The tables in this publication are at Suburb and Postal Area levels. Suburbs have been defined for the region that generally comprises the Perth metropolitan area and urban areas in the City of Mandurah. In precise terms, the region comprises only the set of defined suburbs listed in Table 1. Postal Areas have been defined for the whole of Western Australia.

A Suburb is formed by aggregating whole collection districts (CDs) that fall within physical boundaries of a gazetted suburb on a best fit basis. This approximation process excludes some gazetted suburbs because they do not get a CD allocated to them.

A Postal Area is formed by aggregating whole collection districts (CDs) that fall within physical boundaries of an Australia Post postcode on a best fit basis. The series excludes non-mappable Australia Post postcodes e.g. post office box postcodes, some postcodes which are delivery routes which are also covered by other postcodes (a situation which often occurs in rural areas) and some postcodes which do not get a CD allocated to them.

Household A household is defined as a group of two or more related or unrelated people who usually reside in the same dwelling, who regard themselves as a household, and who make common provision for food or other essentials for living; or a person living in a dwelling who makes provision for his/her own food and other essentials for living, without combining with any other person.

Under this definition, in a group house where occupants share the dwelling, each occupant who usually supplies his/her own food should be counted as a separate household and issued with a separate Household Form. In practice, however, most such households usually only complete one form.

Income People aged 15 years and over are asked to indicate their usual gross weekly income by selecting an income range on the Census form. There are 16 options ranging from 'Negative income', 'Nil income' through to '\$1,500 or more per week'. For example, a person with a gross weekly income of \$650 per week would tick the range '\$600–\$699 per week'. Gross weekly income is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes: family allowance, parenting payment, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, salary, overtime, dividends, rents received, interest received, business or farm income (less operation expenses) and worker's compensation received.

Indigenous A person is defined to be of Indigenous origin if he or she identifies himself or herself as of Aboriginal and/or Torres Strait Islander origin.

Overseas-born Overseas-born people are those who state that they were born in a country other than Australia, those born at sea, and those whose responses are classed as 'Inadequately described' or 'Not elsewhere classified'.

FOR MORE INFORMATION...

<i>INTERNET</i>	www.abs.gov.au the ABS web site is the best place to start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a statistical profile.
<i>LIBRARY</i>	A range of ABS publications is available from public and tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require, or visit our web site for a list of libraries.
<i>CPI INFOLINE</i>	For current and historical Consumer Price Index data, call 1902 981 074 (call cost 77c per minute).
<i>DIAL-A-STATISTIC</i>	For the latest figures for National Accounts, Balance of Payments, Labour Force, Average Weekly Earnings, Estimated Resident Population and the Consumer Price Index call 1900 986 400 (call cost 77c per minute).

INFORMATION SERVICE

Data which have been published and can be provided within five minutes are free of charge. Our information consultants can also help you to access the full range of ABS information—ABS user-pays services can be tailored to your needs, time frame and budget. Publications may be purchased. Specialists are on hand to help you with analytical or methodological advice.
